

Comments PRC-2015-0120-0001-Procedures Related to Commission Views due 8.27.2015

Federal Code of Regulations 39 U.S.C. 407(c)(1) states:

**§ 407. International postal arrangements**

*(c)(1) Before concluding any treaty, convention, or amendment that establishes a rate or classification for a product subject to subchapter I of chapter 36, the Secretary of State shall request the **Postal Regulatory Commission** to submit its views on whether such rate or classification is consistent with the standards and criteria established by the Commission under section 3622.*

You state:

**§ 3017.4**

*(a) The Commission shall establish a deadline for public comments upon establishment of the public inquiry docket that is consistent with timely submission of the Commission's views to the Secretary of State. The Commission may establish other deadlines for public comments as appropriate.*  
*(b) The Commission may suspend or forego solicitation of public comments if it determines that such solicitation is not consistent with timely submission of Commission views to the Secretary of State.*

We disagree with Part B and the suspension or foregoing of public comment. All public comment should be welcomed on any United States treaty, convention, amendment or any other transactions. The privatization of the government should not be the intention of this body. The public needs a voice and representation.
